INTRODUCTION

In Volume I the history of the Coffin Texts project, the basis on which the texts are arranged, and the conventions adopted were explained. For the user's convenience certain information of the last type is repeated here, as it was in Volumes II-VI.

Figures with an asterisk (1*, 2*, etc.) in the blank column to the right of any text column refer to the notes. These have, as far as possible, been given on the same page.

Dashes beside signs (|) mean that these signs were not seen by Sir Alan Gardiner or myself but rest on some other authority—publication or manuscript copy. In the vast majority of cases the authority in question is the manuscript of M. Lacau. As most former copies or publications do not preserve the arrangement of the originals, my arrangement of the signs in these parts is wholly arbitrary.

The symbol 1 is employed to indicate that the signs or sentences separated thereby follow one another in the original without any break.

Sometimes a simple line | will be found. Such a line has no other intention than to guide the eye, for example, if a text starts near the bottom of a page, thus being far away from its designation in the heading of the page. If such a line occurs between words or groups of words, these do not follow one another immediately in the original.

For reasons of economy the device adopted for indicating rubrics in Volumes IV-VI—the use of a grid instead of red—has been continued in this volume. It is believed that the reader will encounter no difficulty in recognizing the substitute wherever it has been employed.

The notes are very brief and have been confined to purely textual matters—corrections, erasures, and the like. Also, in the case of a complicated arrangement or disorder in the manuscript, they help the reader to visualize the original.

The letters on the left-hand side of the page or of each group of parallel texts are meant to facilitate the quoting of the texts, which should in the editors' opinion be quoted by volume, page, and letter—for example, I 79 a, IV 159 d, etc.

The user of Volumes VI and VII may be puzzled by the repetition of Spell 787 on page 415 of the former and page 1 of the latter. This was deemed advisable owing to the regrettable omission, by an error for which the author was not responsible, of the spell number on both the title page and the spine of Volume VI. This spell as printed is identical in both volumes.

By the time Volume VII is published the sad news of the late author's death on October 28, 1959, will long have been known. He had, however, already completed the manuscript of this, the last volume of the *autographed Coffin Texts* in the contemplated project, as well as all alterations and additions printed on pages ix-xviii and the plans at the end of the volume. The book is therefore in every respect as he had planned and prepared it.

The seven basic volumes of *The Egyptian Coffin Texts* will stand forever as the imperishable memorial of their industrious and devoted creator. How perfectly he has realized the ideal of the ancient savants whereby "they made not unto themselves pyramids of brass, with tombstones of iron... but they made heirs unto themselves of the writings... which they made.... More profitable is a book than the house of the builder, than chapels in the West. Better is it than a memorial-stone in a temple.... They are gone... (but their) writings cause them to be remembered."

LIST OF SOURCES USED FOR VOLUME VII

Designation	Description	Provenience	Present Location and No.
A 1 C ¹	coffin of $\left \Delta \mathcal{L}_{\theta} \right $	Aswan	Cairo 28127 (J 36418)

COMPOSITION OF THE COFFIN BOTTOM TEXTS, SPELLS 1029-1185

The spells of these bottoms are not always real spells. In the case of short titles, names, etc., several items have been collected in one "spell" in order to avoid a waste of space. The order of the spells has been taken as far as possible from sources B 4 Bo and, in a lesser degree, B 1 Bo, which give a continuous text, not arranged in the form of a plan, being without vignettes.

There are two groups, which have in common the section of the two roads, the zigzag roads, etc., but are otherwise very different, though also in the sections which they have in common the recension is rather different.

Group I: CT 1029–1035	Nos. 1–6 on the Plans
CT 1036-1087	Nos. 7-58 on the Plans
CT 1088-1130	Nos. 59–101 on the Plans
Group II: CT 1131-1146	Nos. $1'-16'$ on the Plans
CT 1147-1185	Nos. 17'-55' on the Plans
CT 1086	No. 57 on the Plans
CT 1087	No. 58 on the Plans
m CT~1085	No. 56 on the Plans

The parts 1036–1084 and 1147–1185 in both groups are more or less identical. A list of spell numbers and corresponding numbers on the plans at the back of this volume is to be found on pages xiv–xv. Sources belonging to Group I: B 1 C, B 3 C, B 4 C, B 9 C, B 12 C, B 13 C, B 2 Bo (back), B 1 L, B 2 L, B 3 L, B 2 P, B 6 C, B 4 Bo (back), B 1 Bo (top). Sources belonging to Group II: B 5 C, B 1 P, B 1 Be. Source B 4 L belongs to both groups and occurs in CT Spells 1029, 1030, 1033, 1034, 1036–1043, 1046, 1047, 1050, 1051, 1054–1068, 1071 (Group II) and 1147–1176, 1179 (Group II).

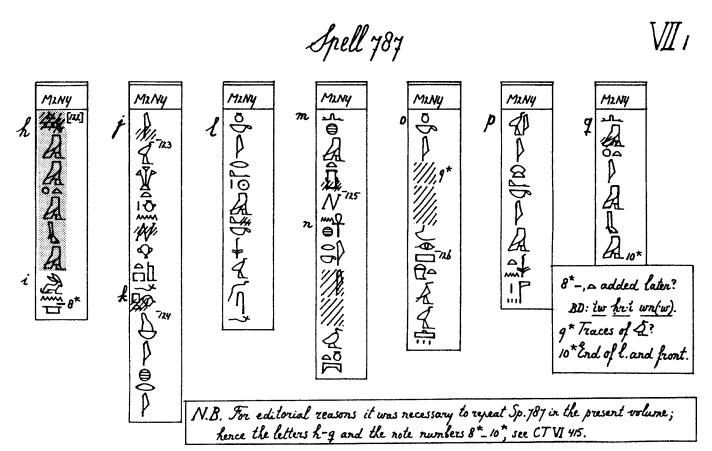

Some of these bottoms were not filled by the "bottom texts" proper, and the scribes have often used this superfluous space for copying spells which do not belong to the ordinary corpus of bottom texts. The place of these spells has been indicated by *letters* in order to avoid ambiguity, and a concordance of these letters and the corresponding spell numbers is to be found on page xvii.
